About The Track

The “ Internet of Thing “ track at IBSSC 2024 at this conference aims to bring together researchers, practitioners, and industry leaders to discuss the latest trends and challenges in IoT. Internet of Things (IoT) plays an important role in the current and future generation of information, network, and communication developing and applications. The Internet of Things (IoT) is a rapidly growing field with applications in a wide range of industries, including healthcare, manufacturing, transportation, and smart cities. Prospective authors are invited to submit original research papers, which propose new methodologies, propose new research directions and discuss approaches or schemes for current existing issues.

Industrial IOT Applications

- Smart Grid and Energy Management
- Health of Machinery
- Logistics and Supply Chain Optimization Smart Manufacturing.

Low power IoT devices/ Systems

- Algorithms for low power IoT
- Low-power communication protocols
- Energy harvesting & Storage

Mobile & wearable Applications

- Wearable health monitoring
- Fitness tracking
- Location-based services

Security concerns in IoT systems

- Security and Privacy for Internet of Things
- Identification and authentication issues
- Intrusion and Attacks in IoT
- Cryptography, key management and authorization for IoT

All presented papers will be submitted for possible publications in IEEE Xplore, which is indexed with world’s leading abstracting and indexing databases subject to meeting Xplore’s scope & quality.
