Call for Papers

Track chairs
Vinit Kotak , Chair Computer Society, IEEE Bombay Section
Vijaya Ahire , MGM University

Submit Paper

The "Cyber Security" track at IBSSC 2024 invites researchers, scientists, engineers, and professionals from academia and industry to contribute their expertise and innovations in the field of Cyber Security .

- **Forensic Analysis of Cyber Crimes**
  - Preserving evidence, identifying criminals, protecting corporate interests, assisting in cyber crime investigations, and facilitating legal proceedings
  - Analysis of suspected cyber attacks, with the objective of identifying, mitigating, and eradicating cyber threats.
- **Data and Application Security**
  - Application security features authentication, authorization, encryption, logging, security testing.
  - Security principals confidentiality, integrity, accountability, availability, least privilege, separation of privilege.
- **Cloud/Web/Wireless Security**
  - Security measures to protect cloud-based infrastructure, applications, and data.
  - Protection of devices and networks connected in a wireless environment.
  - Designing security protocols for accessing wi-fi.
  - Web and database server security, and web application security
- **Computational intelligence in cyber security and privacy**
  - Tactical intelligence, Operational intelligence, Strategic intelligence.
  - Application of AI technologies in Cyber Security
  - Developing AI-powered cyber security system to identify and detect attacks in real time and automate the incident response process.
